

Prompted Contributor Submission Spec

Technical requirements for photographers submitting frames to the Prompted pose reference library. Read the [contributor license](#) and the [model release](#) first; both need to be in place before anything is published.

What to send

- **Set size:** 10 to 15 frames per submission. Fewer is fine for a first look; the lifetime Pro grant applies to an accepted set of 10 to 15.
- **Where:** email support@cooperindustries.cc with the subject "**Prompted contributor**" and a link to the frames (Dropbox, Google Drive, iCloud, WeTransfer, or similar). Do not attach the images to the email.
- **With the frames:** the metadata sheet described below (CSV or a spreadsheet link), and your credit name.

Image requirements

Requirement	Detail
Format	JPEG or HEIC
Size	1200 x 1500 px minimum. Larger is welcome; we downsample.
Orientation	Portrait 4:5 preferred. Landscape accepted for a small number of poses; we crop to 4:5 for the app where possible.
Colour	sRGB or Display P3. No CMYK.
EXIF	Strip all EXIF metadata before sending (location, camera serial, timestamps). On a Mac: Preview > Tools > Show Inspector, or <code>exiftool -all= file.jpg</code> . On iPhone: Photos > share > Options > turn off Location and All Photos Data.
One pose per frame	Each frame shows a single, clearly readable pose. No diptychs, collages, or contact sheets.
Watermarks	None. No logos, borders, or text overlays.
Processing	Normal edit only. No heavy filters, film presets that crush shadows, heavy grain, split toning, or AI enhancement. Skin should look like skin.
Sharpness	Subjects sharp, especially faces and hands. Motion blur only if it is the point of the pose.
Subjects	Everyone identifiable in frame has a signed model release. Frames with unreleased bystanders will be declined.
Filenames	lastname-category-NN.jpg, for example cooper-couples-03.jpg.

Per-image metadata

Supply one row per frame with these fields. Values must match the vocabularies below exactly (lower case, underscores).

Column	Values
filename	The filename as sent
category	couples, engagement, family, maternity, senior
subject_count	Integer, number of people in frame
light	golden, blue, soft_low, mid, harsh_overhead, overcast, open_shade, backlit, indoor_window, night_flash
location	beach, forest, urban, field, studio, home, mountain
release_on_file	yes or no. Must be yes for every identifiable person, including a guardian signature for minors.
notes	Optional. Anything we should know: the prompt you used, accessibility notes (seated, plus-size, wheelchair, late-term), what makes the pose work.

Light vocabulary

Value	Meaning
golden	Sun low, within about an hour of sunrise or sunset, warm directional light
blue	After sunset or before sunrise, soft cool ambient
soft_low	Sun low but diffused, mild direction, no hard shadows
mid	Mid-morning or mid-afternoon sun, moderate elevation
harsh_overhead	Midday sun, hard shadows under eyes and nose
overcast	Cloud cover, flat and even
open_shade	Subject in shade, lit by open sky
backlit	Sun behind the subject, rim light or flare
indoor_window	Indoors, natural window light
night_flash	Night or dark interior, on- or off-camera flash

CSV template

Copy this header row and one line per frame. A Google Sheet or Numbers document with the same columns is fine.

```
csv filename,category,subject_count,light,location,release_on_file,notes
cooper-couples-01.jpg,couples,2,golden,field,yes,"Foreheads together, eyes closed"
cooper-couples-02.jpg,couples,2,backlit,beach,yes,
cooper-family-01.jpg,family,4,open_shade,forest,yes,"Grandparent seated"
cooper-senior-01.jpg,senior,1,indoor_window,home,yes,"Minor; guardian release on file"
```

Review

1. **Curation.** We look at the set as a whole and pick frames that show a pose the app does not already cover, read clearly at phone size, and match the light and location you tagged. Expect some declines; a strong set of 15 might yield 10.
2. **Prompts are ours.** We write the setup steps and the three verbal prompts (playful, romantic, nervous client) for every pose in the library, in the app's voice. Your notes help; you do not need to write prompts.
3. **Credit preview.** Before anything goes live you receive a preview of each accepted pose with your credit line as it will appear ("Photo: "). Correct it then if needed.
4. **Publish.** Accepted frames ship in the next catalog update. Your Prompted Pro lifetime grant is applied to the Apple Account you gave us on the license, usually within a week of acceptance.
5. **Declined frames** are deleted from our systems and are not covered by the license.
